

Lewis Gitonga Muriuki

Medical Student & AI Developer

A dedicated medical student at the University of Nairobi with a strong passion for technology, specializing in Artificial Intelligence, Machine Learning, and Full-Stack Web Development. I also specialize in data analysis (Python/SQL) and dashboarding, translating complex data into clear insights to support decision-making.

EDUCATION & EXPERIENCE

Bachelor of Medicine and Bachelor of Surgery (MBChB)

Expected 2028

University of Nairobi

Pursuing comprehensive medical education with focus on clinical skills and medical research.

- Conducted research on hemophilia
- Completed surgical training electives
- Presented findings at university research symposium

Software Development (AI Specialization)

Feb 2025 - Jul 2025

Power Learn Project (PLP) Africa

Intensive 16-week program covering Python, Web Technologies, Databases, and Software Engineering, with specialization in AI for Software Engineering.

- Certified AI/ML Developer
- Full-stack web development
- Machine learning and deep learning

Medical Research - Hemophilia

2025

University of Nairobi

Conducted literature review on current hemophilia treatments and analyzed patient data to identify patterns in treatment outcomes.

- Literature review and data analysis
- Patient outcome pattern identification
- Research presentation

Clinical Electives - Surgical Training

2024-2025

University of Nairobi

Completed rotations in general surgery, orthopedics, and emergency medicine with hands-on clinical experience.

- Surgical procedure assistance
- Patient management planning
- Post-operative care development

DATA ANALYSIS

Skilled in cleaning, analyzing, and visualizing data to produce actionable insights. Experienced in Python/SQL analytics workflows and building dashboard-ready reporting.

- Data cleaning & wrangling with Python (Pandas, NumPy)
- Analytics queries with SQL (PostgreSQL-style)
- Visualization with Matplotlib/Seaborn and clear reporting
- Prompt BI (dashboarding & BI-style analytics) — gained through the Prompt BI team

SKILLS

Python

JavaScript

TypeScript

SQL

Data Analysis

Prompt BI

Pandas

NumPy

Data Visualization

React.js

Next.js

Node.js

Express.js

PostgreSQL

MongoDB

Firebase

Supabase

TensorFlow

PyTorch

NLP

Computer Vision

Predictive Modeling

Git

GitHub

Tailwind CSS

Focus areas: Data Analysis & BI, Machine Learning, Medical Research, and building AI-powered healthcare tools.

PROJECTS (SELECTED)**Fundi-Client Connection Platform**

Full-stack platform connecting service providers (fundis) with clients, similar to Bolt's business model but for professional services.

- Service matching and workflow automation
- Real-time tracking and user experience improvements

React.js

Node.js

Supabase

Mapbox API

AI-Integrated Hospital Management System

Comprehensive hospital management system with AI-powered features for patient care optimization and administrative efficiency.

- Prediction and decision-support concepts for patient care
- Patient history analytics and workflow optimization

Python

TensorFlow

React.js

MongoDB

HIGHLIGHTS

- Medical student (University of Nairobi) combining clinical training with software and AI.
- Completed PLP Africa AI specialization; certified AI/ML developer.
- Strong data analysis skills (Python/SQL) and Prompt BI dashboarding experience from the Prompt BI team.

CERTIFICATIONS

- Certified AI/ML Developer — Power Learn Project (PLP) Africa
- ITCILO Hackathon Certificate
